ENR 5.5 AERIAL SPORTING AND RECREATIONAL ACTIVITIES

Aviation Recreation is a subset of General Aviation
SACARS Part 1 Definitions

(a) "General Aviation Operation" means an aircraft operation other than a commercial air transport, air ambulance or aerial work operation.
(b) "Aviation Recreation" means flying microlight, glider, balloon, gyroplane, hang-glider, paraglider, model aircraft, light sport aeroplane, touring motor glider, parachute, or involvement in aviation events.
Aviation recreation is South Africa is conducted in terms of Part 94 and Part 105 of the SACARS.
This document relates to the approval of aviation recreation operational flying areas, airfields, drop zones, launch and landing sites and the conducting of aviation events at certain areas as listed below:

1) Para-Gliding launch and landing sites Permanent/Temporary.
2) Hang Gliding launch and landing sites Permanent/Temporary.
3) Radio controlled model aircraft operational areas and Radio-controlled model aircraft operations.
4) Gliding and soaring operational areas.
5) Aerobatic (acrobatic) operational areas & cylinders.
6) Manned Free Balloons, Captive Balloons, Unmanned Free Balloons Blimps, tethered balloons.
7) Parachute Drop Zone.

Contact SACAA
For all Aviation Recreation operational enquiries or operational approvals contact:

Purpose
The purpose of this publication is to alert and inform all pilots and operators of aviation recreational operations conducted in airspace and areas in the Republic that may present risk or affect their operations and intended flight, in order to properly plan, maintain a constant lookout and radio watch and to avoid such airspace and areas in the interests of safety.

All pilots and operators are reminded that in terms of Part 91 of the SACARS it is their responsibility to be familiar with regulations, procedures and adhere to the duties of the PIC during flight preparation as extracted below:

Laws, regulations and procedures
91.02.6 (1) The PIC of an aircraft shall be familiar with the laws, regulations and procedures pertinent to the performance of his or her duties, prescribed for the areas to be traversed, the aerodromes to be used and the air navigation facilities relating thereto and shall ensure that other members of the flight crew are familiar with such laws, regulations and procedures as are pertinent to the performance of their respective duties in the operation of the aircraft.

(2) Subject to subregulation (3), the PIC of an aircraft shall comply with the regulations contained in this Part unless they conflict with the rules published by the State having jurisdiction over the territory over flown: Provided that if any regulation of this Part is more restrictive and may be followed without violating the rules of that State, it shall be complied with.

(3) In an emergency situation which endangers, or is likely to endanger the aircraft, persons on board such aircraft, or persons or property on the surface, the PIC shall take any action which he or she considers necessary under the circumstances.

(4) If a PIC deviates from any law, regulation or operational procedure in an emergency situation referred to in subregulation (3), he or she shall notify the appropriate authority of the State within or over the territory of which the deviation occurs, of such deviation without delay.

Duties of PIC regarding flight preparation
91.02.7

(2) The PIC of an aircraft shall
(a) not commence a flight unless he or she has ascertained through the relevant NOTAM, AIC, IAIP or IAIP Supplement that the aerodromes, navigation aids and communication facilities are adequate for the manner in which the flight is to be conducted;

GLIDER AREAS

1 South African Approved Glider Areas

1.1 Gliding operations take place, mostly over weekends and public holidays, at the aerodromes listed below. Adjacent to these locations, gliders may be encountered by day in VMC (Visual Meteorological Conditions) in Class G airspace up to FL195 as far as 50NM from their aerodromes of departure.

1.2 Glider areas in Class C airspace are downgraded to Class G airspace on an operational basis and IFR traffic is routed around the Glider windows by ATC.

1.3 Gliding operations are VFR flights which take advantage of thermal activity and can be expected to fly to the limits of VFR cloud base minima. All pilots are therefore advised to be especially vigilant when flying in these areas.

1.4 Winch launches may tow gliders up to 3000FT AGL at climb rate of APRX 1800FPM. When crossing glider fields where winch launching takes place, pilot shall remain vigilant, maintain a visual and listening watch and ensure that the crossing height is not less than 4000FT AGL and 1NM lateral distance away.
If intending to overfly an active winch launch airfield, contact the gliding aerodrome ground radio on 123.4 MHz or published aerodrome frequency for launch information

1.5 The below-mentioned areas have been approved to perform Glider Operations at the locations listed below.

1.6 Abbreviations: A - Aerotow, S - Self Launch (motor glider), W - Winch, SR - SS sunrise to Sunset.

1.7 Aviation Events I.e. Glider camps and competitions shall apply to SACAA for operational approval.

1.8 Prior to operational approval the applicant shall obtain FUA (Flexible Use of Airspace) from CAMU for the required airspace and NOTAM or AIRAC notification process.

1.9 Any operations to be conducted within Controlled Airspace require approval from the relevant ATSU and a signed Letter of Procedure (LoP) with the ATSU.

1.10 Aerodromes marked with an asterisk (*) are active only on occasional weekends or for fixed period camps which will be notified via NOTAM.

1.11 Hours of operations are always SR-SS unless otherwise specified.

JOHANNESBURG FIR

1.12 New Tempe Glider Area (Window)

GENERAL

1.12.1 During the activation period of the glider window that part of the Bloemfontein TMA or Johannesburg CTA within which the glider window falls will be reclassified as Class G airspace.

1.12.2 The notification that the glider window is activated will be via NOTAM or direct requests to ATC via the R/T or telephone during ATS operational hours.

1.12.3 Standard separation will not apply -pilots are to maintain own separation.

1.12.4 Aircraft may, when the glider window is activated, transit this airspace at their own discretion.

1.12.5 Pilots are required to keep a careful lookout at all times whilst operating within the window.

1.12.6 When the Glider Window is active it is recommended that the New Tempe circuit traffic and the New Tempe Glider Window traffic operate on a common frequency, therefore the New Tempe frequency 131,3 MHz will be extend to include the operations within the Glider Window.

1.12.7 The glider window is not a general flying area but airspace approved for glider operations.

1.12.8 Flights are authorized to operate within the window during the day and in VMC only.

DESIGNATION AND LATERAL LIMITS	VERTICAL LIMITS	OPERATOR / USER TEL NO.	REMARKS: WINDOW ACTIVATION / DEACTIVATION AND WINDOW FREQUENCY
JOHANNESBURG FIR			
New Tempe Glider Area (Window): From a point 290528.83S 0261021.31E at the intersection of the R64 and N1 main roads, then westwards along the R64 to a point 290333.86S 0260754.02E at the intersection of the Bainsvlei road, then westwards along the Bainsvlei road to a point 285445.00S 0254007.00E where this road intercepts the 35 nm arc of the Bloemfontein TMA boundary, then clockwise along the 35 nm arc centred at BLV (290602.38S 0261802.31E) to a point 283259.00S 0260409.00E where this arc intercepts the Bloemfontein/ Bultfontein road, then southwards along the Bloemfontein / Bultfontein main road to a point 290018.68S 0261226.59E where the Bultfontein / Bloemfontein main road intercepts the Bloemfontein CTR boundary, then a straight line along the Bloemfontein CTR boundary to a point 290323.61S 0261226.42E where the Bloemfontein CTR boundary intercepts the N1 main road, then southwards along the N1 main road to the starting point 290528.83S 0261021.31E	FL145 GND	ATC: +2751 - 5037201-6 Glider Club:+2751 - 446 1762 / 451 1503	The local Kenilworth Glider Club representative will telephonically contact Bloemfontein ATS for approval to activate the New Tempe Glider Area (Window) and an activation time will be confirmed by the duty ATC. A minimum activation time of 30 minutes is required, as ATC will issue the appropriate NOTAM. Aircraft operating within the Glider Window will be required to monitor 131,3 MHz and make broadcasts as appropriate. The local Kenilworth Glider Club representative will telephonically advise Bloemfontein ATS when the last glider has landed, whereby the duty ATC will close the glider window.
1.When the glider window is activated during ATC hours of operation, the ATC will route IFR flights operating within the Bloemfontein TMA onto inbound tracks to the IFR clearance limit, which will ensure that the sector entry will not enter the glider window. 2. New Tempe AD has been allocated a dedicated frequency of 131.3 MHz			

1.13 GLIDER OPERATIONS OUTSIDE THE DEFINED WINDOW: CROSSING OF AIRWAYS / CONTROLLED AIRSPACE AND OPERATIONS WITHIN CONTROLLED AIRSPACE.

The following will apply:-

1.13.1 Crossing of airways will be right angles.

1.13.2 Pilots are to establish radio communication with ATC ten (10) minutes prior entering controlled airspace.

1.13.3 Pilots must maintain two way radio communication with ATC on the appropriate frequency.

1.13.4 Gliders must be equipped with mode C transponders when operating within the Bloemfontein/Johannesburg controlled airspace.

1.13.5 Pilots wishing to enter controlled airspace must file a flight plan except when crossing an airway at right angles.

1.13.6 Powered aircraft operating on flight plans will have priority and crossing of controlled airspace by gliders will only be approved, traffic permitting.

1.14 WELKOM / HENNEMAN GLIDER AREA (WINDOW)

GENERAL

1.14.1 Aircraft may, when the glider window is activated, transit this airspace at their own discretion. Pilots are to keep a careful lookout at all times whilst operating within the window.

1.14.2 Standard separation will not apply - pilots are to maintain own separation.

1.14.3 The glider window is not general flying area but airspace approved for glider operations.

Designation and lateral limits	Vertical limits	Operator / userTel Nr	Remarks and time of ACT
JOHANNESBURG FIR			
Welkom / Henneman Glider Area (Window) (a)From a point at 274220S 0271100E (the intersection of the Virginia / Kroonstad power lines and the Odendaalsrus / Kroonstad road (R34) on the old Welkom TMA boundary) southwards along the power lines to the Geneva railway station. (b)Thence southwards along the railway line to Virginia. (c)Thence south eastwards along the road to Aldam (Allemanskraal-dam). (d)Thence anti clockwise along the 30NM arc of a circle centred at the point 275820.23S 0264211.08E to the starting point at 274220S 0271100E.	FL105 GND		ATC Johannesburg Central will release the window for the benefit of glider operations with 30 minutes prior notice. The ATC Johannesburg Central will be advised telephonically +2711 928 6452 when gliding commences and when the last glider has landed. In the event of the telephone system being unserviceable, ATC Johannesburg Central will be advised on frequency 120.3MHz Pilots are to comply with the Traffic information Broadcast by Aircraft (TIBA) when operating within this window.The maximum level permitted within the window will be FL 105. Requests for higher levels may be submitted and authorization for such flight may, subject to traffic, be delayed or refused.
Note 1:Glider flights are authorized to operate within the window during the day in VMC only.			

1.15 GLIDER OPERATIONS OUTSIDE THE DEFINED WINDOW: CROSSING OF AIRWAYS / CONTROLLED AIRSPACE AND OPERATIONS WITHIN CONTROLLED AIRSPACE.

The following will apply:-

1.15.1 Crossing of airways will be at right angles.

1.15.2 Pilots are to establish radio communication with ATC ten (10) minutes prior to entering controlled airspace.

1.15.3 Pilots must maintain two way radio communication with ATC on the appropriate frequency.

1.15.4 Gliders must be equipped with mode C transponder when operating within the Johannesburg controlled airspace.

1.15.5 Pilots wishing to enter controlled airspace must file flight plans except when crossing an airway at right angles.

1.15.6 Powered aircraft operating on flight plans will have priority and such crossing of controlled airspace will only be approved, traffic permitting.

1.16 JOHN WESTON AIRFIELD

Pilots wanting to OPR at John Weston airfield must first CTC FAKM ATC on Tel: (+2753) 851 1012 or FREQ 118.2 MHz during HR of OPR. Pilots are also reminded to remain clear of FAKM CTR due different FREQ in use. Joining clearance can be obtained from FAKM TWR on FREQ 118.2 MHz before entering the CTR.

1.17 PARAGLIDING OPS WITHIN 5NM OF FAWM

Pilots to exercise caution due to paragliding operations taking place within 5NM of Welkom Airfield. Vehicle winch launches on runways. Static winch launches alongside runways. Free flying and landings. RWY07/25 and 15/33 will be utilized. Airband will be monitored during activities on freq 118.0MHz. Daily between SR-SS.
GND/10 000FT AGL.

1.18 MAGALIES/ORIENT GLIDER AREA (WINDOW).

GENERAL

1.18.1 During glider operations the part of the window within JHB CTA will be deemed to be uncontrolled airspace.

1.18.2 Aircraft may transit this airspace at their own discretion - pilots are to keep a careful lookout at all times whilst within the window.

1.18.3 Standard separation will not apply -pilots are to maintain own separation.

1.18.4 Window is not a general flying area but airspace approved for glider operations.

1.18.5 Gliders will maintain a listening watch on FREQ 126.7 MHz whilst inside the glider window.

Designation and lateral limits	Vertical limits	Operator / userTel Nr	Remarks and time of ACT
JOHANNESBURG FIR			
Magalies/Orient glider Area (Window): (a) From 261510S 0270820E on the Southern tip of the Western Edge of the Klerkskraaldam. (b) Thence the JSV 60DME arc, coinciding with the Johannesburg CTA boundary, to a point 261510S 0271420E (c) Thence North East along this road to a point 261040S 0272800E where the powerlines cross the R47. (d) Thence North East along the powerlines to where they cross the Brandvlei/Orient road at 260510S 0273510E. (e) Thence a straight line to a point on the Tarlton /Magaliesburg Road at the road junction which is the entrance to the Tarlton raceway 260328S 0273836E. (f) Thence along the Tarlton Magaliesburg road to a point 260220S 0273627E on the Johannesburg TMA. (g) Thence a straight line to the Magalies Tower 255137S 0273148E; (h) Thence a straight line to a point 254210S 0271455E to the Southern edge of Rustenburg. (i) Thence to the starting point 261510S 0270820E.	FL145 FL110		The shift supervisor or senior ATC O R Tambo Inter-national will be advised telephonically (+2711 928 6439/40) when gliding commences and when last glider has landed. In the event of the telephone system being unservice-able, ATC will be advised on FREQ 119.5/126.7 MHz. Glider may be raised on airfield FREQ 123.4 MHz.
Note 1:Gliders are to remain south of the town of Rustenburg and at least 2 NM South of the Southern most point of Buffelspoortdam. Note 2:Glider flights are authorized to operate VMC only within the gliding area. Note 3:Gliders are to remain West of the Tarlton/Magaliesburg main road and to the North of the power lines whilst at FL 110 and above. Note 4:Pilots to exercise caution due to the recommencement of winch launching and aero tow FLT at Orient. Winch launching is extremely hazardous to transient TFC. Not only is the cable virtually invisible, a glider that appears stationary at the end of a RWY can be airborne in 100M and climb to 1800FT AGL in APRX 45 seconds. Special rules FREQ: 125.8 MHz Orient AD: 123.4 MHz. GND to 1800 FT AGL.			

1.19 WEEKDAY OPERATIONS

The following will apply:-

1.19.1 ATC FAOR will release the window for the benefit of glider operations with 30 minutes prior notice.

1.19.2 Maximum flight level will be FL 145 within the window (request for higher may be submitted).

1.19.3 Glider window above FL 105 will only be available between 0800 - 1400.

1.19.4 The authorization for flights above FL105 may be delayed or refused in case of high traffic density in the airspace concerned.

1.19.5 Pilots to listen out on 126.7 MHZ when above FL105.

1.20 WEEKEND OPERATION.

The following will apply:-

1.20.1 ATC FAOR will release the window for the benefit of Glider operation with 30 minutes prior notice.

1.20.2 Maximum height within the window will be FL185.

1.20.3 The glider window will be available between the hours 0800 - 1600. Outside these hours operations will only be approved with prior liaison.

1.20.4 Pilots to listen out on 126.7 MHz when above FL105.

1.21 GLIDER OPERATION OUTSIDE THE ABOVE WINDOW.

This is subject to normal controlled airspace restrictions e.g.. not above 7500 FT below the JHB TMA and not above FL 105 below the JHB CTA.

1.22 PUBLIC HOLIDAYS.

Public holidays will be treated as normal working days. The weekend operation may be applied on an ad hoc basis with prior arrangement with ATC i.e. check on the morning in question if ATC can accommodate gliders above FL 145. The authorization may be delayed or refused in case of high traffic density in the airspace concerned.

1.23 SPECIAL DAYS ON LONG WEEKENDS.

Glider clubs may submit their requests to Chief ATC FAOR for consideration and approval. Such request will be submitted timeously to allow for necessary NOTAM action.

1.24 CROSSING OF AIRWAYS/CONTROLLED AIRSPACE OTHER THAN THE WINDOW

The following will apply:-

1.24.1 Pilots must have two way communication on the appropriate FREQ.

1.24.2 Gliders must be equipped with serviceable mode C transponder.

1.24.3 Crossing of airways will be at right angles.

1.24.4 Pilots are to establish R/T communication with ATC 10 minutes prior to entering controlled airspace.

1.24.5 File the necessary flight plan when pilot wishes to enter controlled airspace except when crossing an airway at right angles.

1.24.6 Powered aircraft operating on flight plans will have priority and such crossing of controlled airspace will only be approved traffic permitting.

2 South African approved Hot Air Ballooning areas

3 South African Approved Radio Controlled Model Aircraft Flying Areas

3.1 The under mentioned clubs are approved to perform Radio-Controlled Model Aircraft Operations.

3.2 All Radio Modelling Operations are conducted strictly according to an approved Manual of Procedures.

3.3 Temporary increased height approvals may apply as per FUA (Flexible Use of Airspace) / CAMU (Central Airspace Management Unit) processes and for NOTAM publication.

3.4 Any operations to be conducted within Controlled Airspace require approval from the relevant ATSU and Letter of Procedure (LoP) with the ATSU.

3.5 All radio modelling sites will be a 0.5NM radius centred around the coordinates, unless otherwise specified.

4 South African Approved Hang and Paragliding Glider Launch and landing sites

4.1 All Hang and Paragliding launch sites published herein are for Recreational Aviation hang and paragliding operations only.

4.2 A 1 NM Radius is applied to all Hang and Paragliding launching sites.

4.3 Hang and Paragliders are to remain clear of all controlled airspace as published in the Aeronautical Information Products when leaving the defined launch sites listed here.

4.4 Any operations to be conducted within Controlled Airspace require approval from the relevant ATSU and a signed Letter of Procedure (LoP) with the ATSU.

4.5 Hours of operations are always SR-SS unless otherwise specified.

KEY TABLE:

5 South African Approved Aerobatic Areas

5.1 In terms of the approved Aviation Recreation Organisation (ARO) Manual of Procedure (MOP) for Sports Aerobatics the aerobatics cylinder is a 1NM radius centred around the coordinates.

5.2 Any operations to be conducted within Controlled Airspace require approval from the relevant ATSU and/or Letter of Procedure (LoP) with the ATSU.

5.3 Such aerobatic cylinder (Boxes) shall be activated / de -activated with the relevant ATSU prior to being used or closed for any aerobatic practice, training or competitions as per the agreed operations procedures as contained in an approved operational Manual of Procedures (MOP).

5.4 All aerobatic cylinders shall be from ground level to a maximum of 4000ft AGL, unless otherwise specified below.

5.5 Hours of operations are always SR-SS unless otherwise specified.

5.6 Please note that unless the aerobatic cylinder is in regular use, consult with the South African Civil Aviation Authority prior to utilizing as there may be certain restrictions that need to be considered/advised on.

6 South African Approved Parachute Drop Zones

6.1 All permanent parachute (skydiving) drop zone approvals are approved for Aviation Recreational operations at bona fide parachute clubs approved hereunder.

6.2 A listening watch and position reporting must be maintained on the appropriate frequencies by all aircraft operating from or to the areas stipulated.

6.3 Where an air traffic control unit is in operation and within controlled airspace, permission prior to dispatching parachutists/skydivers must be obtained from the responsible Air Traffic Service Unit.

6.4 Parachute jumps away from approved drop zones i.e., temporary drop zones or demonstration parachute jumps, will require prior operational approval from the SACAA.

6.5 Any parachute/skydiving operations to be conducted within Controlled Airspace shall require approval from the relevant ATSU and/or Letter of Procedure (LoP) with the ATSU.

6.6 All Parachute Drop Zones flight areas shall be within a cone of 5NM radius centred on the co-ordinates of the approved landing area, unless specified otherwise.

6.7 All persons conducting a parachute/skydive descent shall land on a parachute landing area approved by the SACAA.
